Increasing agility and flexibility
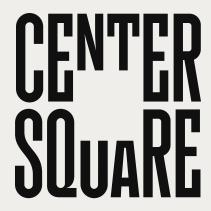

Say hello to on-demand provisioning and access to a robust ecosystem of network, storage and compute services.

CENTER SQUARE

We build infrastructure around your business so it can flex and endure not only as your business needs evolve, but as the IT landscape changes. At Centersquare, we understand the importance of optimal **performance, security, and cost-efficiency**. We have you covered.

Utilizing on-demand infrastructure powered by the Centersquare Digital Exchange, you can quickly provision the services you need, seamlessly from your colocation environment, and scale up as your requirements change.

How Centersquare enables more agility and flexibility to scale your business:

Easy, rapid modernization
Rapidly provision networking, storage, and compute — and easily scale up as needed directly from your core colocation environment.

Built for tomorrow
We're continuously bringing strategic providers into our ecosystem so you have access to best-in-class modern technologies your business will need in the future.

Faster time to market
Deploy your IT infrastructure in minutes, not months, with on-demand provisioning and connectivity.

Right-size connectivity effortlessly
With the ability to spin up services on demand, you no longer risk overprovisioning bandwidth.

Maximum visibility and control
Manage and monitor your complete environment via our powerful, fully automated platform.

The Centersquare platform enables you to provision and configure the capacity you need when you need it. With a best-in-class management portal and complete portfolio of on-demand offerings at your fingertips, your IT team can rapidly solve for IT modernization with:

Network solutions

Our Digital Exchange is a resilient, programmable network fabric that enables you to configure and optimize your networks at the speed of software. Facilitate secure data migration, seamlessly extend your environment, and connect directly to our rich ecosystem of network, cloud, and service providers, all via API or web portal — no routing equipment or physical cabling required.

Enterprise storage

We offer an on-demand storage-as-a-service offering — powered by ecosystem provider, Zadara — providing convenient, flexible storage with a pay-as-you-go, fully-managed cloud model. With rapid deployment and support for any protocol, Enterprise Storage is a highly secure and scalable solution that makes it easy to modernize and expand storage-intensive environments.

Enterprise Bare Metal

Enterprise Bare Metal (EBM) enables you to provision dedicated, best-in-class bare metal servers from providers like HPE, Dell, NVIDIA, and Fujitsu. EBM empowers you to modernize your infrastructure by giving the power, performance, and control of dedicated hardware with the simplicity and scale of on-demand provisioning.

Smarter remote management

Our Command Center gives you a unified interface to provision, monitor, and control your complete data center environment from anywhere. From monitoring colocation to deploying digital services, the portal's expansive functionality and intuitive user experience simplify operations while maximizing control, enabling teams to modernize their environments with visibility, speed, and precision.

By connecting to our Digital Exchange platform directly from your core colocation environment, you can achieve a balance of performance, flexibility, and cost-efficiency as you deploy new workloads. This hybrid capability ensures that your IT infrastructure remains agile, robust, and aligned to your evolving business requirements to support your continued growth.

Whatever you need, we are here to help.

If you need any assistance with pricing or scheduling a tour, please email us at or call us. We look forward to working with you.
